

IndiSplit has been designed to work with the traffic light range of products such as the Indicator and the Clockwatch. To display the legacy dumb lamps of LightTower and Indicator Lamps together with newer, auto detecting, CombiLamp and CombiTower.

This 1x4 active Splitter allows more lamps from one output to be driven and can increase the distance when used mid point.

A distance of 200m would be common, although this is cable dependant.

Main Features

- ✓ 4 outputs
- ✓ Active Splitter
- ✓ Greater cable distance

3 Year Limited Factory Warranty

Specifications:

Signals:
