

Universal Stand

RF Receiver and remote display support

Description

The Universal Stand has been designed to support cabled lamps, remote displays and RF receivers from the Interspace Industries brand. This will stop the RF Receiver just being laid down on top of the system thereby ensuring the aerial is in an efficient position.

Using the Universal Stand for the RF Receiver is the next best thing to hanging it back stage near to the presenter and orientating the aerial to the correct plane (pointing up).

The Universal Stand will enable the CombiLamp to be displayed on a desk for confidence or indication.

Features

- ✓ Simple tool
- ✓ Easy set up
- ✓ Fully assembled
- ✓ 1.5m fixed lead

Specifications

Connectors:

1 x Male XLR (on stand) 1x Female XLR (cabled)
